More specifically, the logic involved in the automated processing enables: i) the objective risk assessment, ii) its integration in a homogeneous risk group, on the basis, mainly, of the frequency, and iii) the scale of the damage that it may cause, as well as its appropriate pricing. The automated processing concerns data that you have provided via your insurance application, as well as data that may be collected from third sources. Based on this automated processing, a variation in the premium may occur.

As regards this Processing, you have the right not to be subject to any decision if such decision is based exclusively on automated processing and produces legal effects concerning you or affects you significantly. You have also the right to express your point of view regarding this decision, to be informed of its justification and contest its content.
